DOUBLE UP RULES

After each game with a win less than 10 X TOTAL BET, the player can take a chance to double the win and enter Double-UP mode by pressing DOUBLE button. In the middle of the double-up screen a card is displayed face down. The player should guess whether the card is red or black, or the suit of the card (by pressing the appropriate button). If the player has guessed the correct card color, the gambled amount is multiplied by 2. If the player has selected the correct card suit, the gambled amount is multiplied by 4. If the player has selected an incorrect card color or suit, the gambled amount is lost. At any time the player can exit the Double-Up mode and return to the game by collecting his win with START button.

The player can gamble only half of his current win by pressing HALF GAMBLE button.

The win doubling is allowed up to 50 x TOTAL BET. When this limit is reached, the player collects the win automatically and returns to the main game.
